CONTEC Pedal "Carbox"

Description

Our smoothest pedals yet are called Carbox, and they take your trail adventures to a whole new level: They're the first platform pedals in our lineup to feature an aluminum body with an extremely lightweight carbon cage. Their high-quality titanium axle and sealed industrial bearings ensure an incomparably smooth rotation.

The CrMO pins on the Carbox pedals offer plenty of grip—and if they wear out after a while, they're easy to replace.

Both pedals together weigh just 230 grams; they are 10.4 cm long, 9.5 cm wide, and 2.5 cm high.
