EVP:	**16.95 €**

Description

Best braking performance for retro bikes
A stable brake lever that does not flex is the prerequisite for optimal functioning of cantilever, roller and side-pull brakes in addition to good adjustment.

The CONTEC brake lever "BL-CL RETRO" is perfect for these types of brakes thanks to its sturdy design made of light and torsion-resistant aluminium. The brake lever in a discreet black and silver for the right-hand side can be universally mounted on all handlebars and combined with various shifters. The wide aluminium lever for 4 fingers allows easy access and good modulation at all times. The practical limit screw can also be used to adjust the distance of the brake lever to the handlebar to individual needs.

Thanks to its torsional stiffness and ergonomic adaptability, the CONTEC brake lever "BL-CL RETRO" takes the best out of cantilever, roller and side-pull braking systems and, with its subtle colours and its classically curved lever, perfectly matches retro bicycles.

Technical data

Mounting	right
Brake type	Side pull / road brake
Range of application	City
Main colour	silver
Secondary colour	black
Lever length	4-finger
Material	aluminium
Weight	0.113 kg
