EAN:	4251971165823
EVP:	**3799.00 €**

Description

The Victoria TRESALO 15 hub-gear model is a reliable companion for both everyday use and touring. The Shimano “Nexus” 5-speed hub, designed specifically for use on e-bikes, is available with either a coaster brake or a freewheel. The smart Bosch system provides more than enough support for your pedaling effort thanks to the new Performance engine and the “PowerTube 625” battery.

The “Kiox 300” color display provides useful information about your current route and remains perfectly legible even in the dark. If the available information isn’t enough, you can access additional features via the free eFlow app. When paired with other navigation apps, such as Komoot or Strava, this opens up entirely new riding experiences with the new bike.

We’ve designed the TRESALO models with integrated PowerTube batteries to feature a stable and stiff frame. The riding position—as you’d expect from a Victoria—is more upright and comfort-oriented than overly sporty and stretched out.

As with all new Victoria models, the battery integrated into the down tube can be removed from the top. This eliminates the need to support the bike, as is required when removing it from the bottom. However, given the large capacity and the resulting weight of the battery, we recommend charging it while it’s still in the bike, as it’s simply more convenient.
