CONTEC Handlebar "Mito 90"

Description

CONTEC Mito 90 Handlebar

The Mito 90 from CONTEC is a handlebar made of aluminum and with a width of 660mm. The stem clamp is 31,8mm. The backsweep of 37° allows you to grip the handlebar more ergonomically than one without this bend. The backsweep describes the handlebar bend in the direction of the saddle and should avoid the overstretching of the hands and the upper body. The more backsweep, the more relaxed the seating position. And just as the other way around.
