

CONTEC Grip "MERGE Urban Kork"

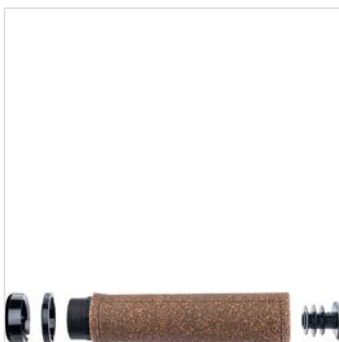

Description

At CONTEC you will find a wide variety of grips made of different materials, in different shapes and for different riding styles. Our MERGE grips adapt to you - not the other way around. They are divided into the categories City, Urban, Trekking and Mountain.

The CONTEC MERGE Urban cork grips are particularly suitable for more active cyclists who have a slightly forward leaning posture when riding - like on a trekking bike, for example.

The cork material is particularly skin-friendly and breathable. Sweat from your hands is quickly absorbed and shocks from uneven ground are directly cushioned so that your wrist is not put under too much strain. The cork on the grips not only looks stylish, but is also made from renewable raw materials!

Another special feature of the MERGE grips is that they are compatible with our G-Link system. The G-Link interface allows you to attach practical accessories such as a bike mirror or bells directly to the grips.
