Main colour	black
Belt system	3-point
Material	plastic
Max. load capacity	22 kg
Mounting	rear
Weight	4.480 kg
Certification	EN 14344, GS, TÜV
Body size	|

Description

For mobile families
The new Bobike "Go 1P" rear-facing child seat is available in five fresh pastel paints and, like the other child seats from Bobike, is made with a robust double-walled seat shell. Children from around 9 months can sit in the robust scarves when they are able to sit stably themselves, and the Go 1P is approved for weights up to 22 kg.

This gives mobile parents a simple and practical way to take their children with them on all everyday trips or tours, especially as the Bobike child seat holder is also available separately for the second parent bike and others. Incidentally, the Bracket displays when the bars are correctly engaged.

The "Go 1P" with its bars is simply inserted into the bracket on the seat tube (diameter between 28 mm and 40 mm) behind the rider. The Bracket also displays when the bars are correctly engaged.

The child is strapped into the padded (water-repellent padding) double-wall shell via a three-point harness, the locks of which parents (and only parents) can close and open with one hand. There is room for the feet on the height-adjustable foot rests and they can also be strapped in using the loops. A reflector on the back provides additional safety when being seen. Tested in accordance with safety standard EN 14344, TÜV and GS.
