

Product data sheet

polini Oil seal

Description

oil seal

reinforced, to replace the original simmerring's, Viton body, matallic rail from steel, inner bord with teflon plating

Are perfectly suitable to replace the original simmerring's, can be mounted on the drive shaft, and also on the main shaft of the CVT drives. They are made of VITON, to cope with the highest thermal stresses. They have a protection board with teflon plating. Thanks to this characteristic, these seals have a very low coefficient of friction, which allows smaller losses caused by friction. Furthermore, these simmerrings keep temperatures low and are more durable compared to standard rings. They are designed for competition engines, and also perfect for the standard motors. Technical features: Viton housing, metallic frame from steel inner board with teflon plating with very low friction coefficient, **size: 17 x 28 x 5**

Article number:	78096500
Original number:	285.0135
EAN:	8054705085550
EVP:	8.40 €

Technical data

Design	single
Outer diameter	28.0 mm
Range of application	simmerring
Main colour	blue
Height	5.0 mm
Inner diameter	17.0 mm
Weight	0.007 kg
