

MAXIMA RACING OILS Radiator liquid "Coolanol "

Article number:	05718693
Original number:	82964
EAN:	051027004717
EVP:	20.95 €

Technical data

Range of application	motorcycle, scooter
Colour designation	green
Main colour	green
Container type	bottle
Content	1.893 l
Type	radiator
Weight	2.193 kg

Description

MAXIMA RACING OILS "Coolanol" Coolant

Down to -37° C, ready-to-use coolant and antifreeze

Reliably protects the engine from overheating and freezing even under the most extreme conditions. The high-quality formulation combines pure ethylene glycol, deionized water, and modern additives for optimal cooling, water pump lubrication, and comprehensive corrosion protection. A powerful anti-foaming system reduces cavitation at the pumps and increases cooling performance. Compatible with most OEM glycol coolants. Contains no nitrates, amines, or borax; when unused, it is **100% biodegradable when unused**.

Ideal for all liquid-cooled engines that require conventional or hybrid ethylene glycol-based coolants and antifreeze. Simply pour in—no mixing required. **Color: green, 1.893-liter water bottle**
