

CONTEC Handlebar "Moab 35 Flat"

Description

Handlebar from CONTEC

The Moab 35 Flat is a handlebar with a width of 680mm. Made from aluminum. The stem clamp is 35,0mm.

Thanks to the oversize clamping of 35mm you get an even firmer cockpit with optimized weight, which makes this handlebar ideal for particularly heavy bikes or riders and demanding routes.

Backsweep indicates the bend of the handlebars in the direction of the saddle and is 5° in this case. The more backsweep, the more upright and relaxed you can sit on your bike or e-bike. Sporty handlebars have a low bend.
