

CONTEC Pedal "Trail2"

Description

Unbeatable off-road

If you are a sporty off-road cyclist or go on longer bike tours, you want secure contacts with the pedals as well as high stability and lightweight components.

The CONTEC MTB/trekking pedal "Trail2" therefore impresses on MTBs or sporty cross and touring bikes. The pedal is made from a one-piece CNC-milled aluminum body and thus combines high stability and stiffness with a low weight of only 281 g. Grippy profiles on both sides ensure a good grip with any footwear. In addition, sealed industrial bearings ensure durability and smooth running while protecting against the wear-promoting effects of water and dirt ingress. The robust CrMo steel Axle is equipped with a 9/16" thread and can therefore be easily mounted on all standard cranks.

The CONTEC MTB/trekking pedal "Trail2" is ideal for use on MTBs and sporty cross and touring bikes.
