CONWAY Electric allroad "Nyvon 9.0" Mod. 24

Description

Reach your destination instead of giving up! Thanks to the Bosch SX engine, you get a tailwind exactly where you need it—taking the fear out of long distances or steep climbs. Our "NYVON" offers the perfect blend of an e-bike and a purist gravel bike—a fast carbon frame with just the right amount of power you need.

Precise, responsive handling, a comfortable yet sporty riding position, and stable straight-line tracking ensure a well-rounded riding experience on gravel, roads, and all the trails beyond. If your ride takes you from dawn to dusk, you'll have a powerful front light included right from the factory to properly illuminate your path.

The "NYVON" also features 5 mounting points for luggage as well as a kickstand mount for direct attachment to the rear triangle. The Control Unit for your Bosch system is centrally located on the top tube and can be operated via a mini-remote on the Handlebars without having to change your grip.
