

CONTEC Chainring "C.Drive B"

Description

The chainring is one of the central drive components of your bike. It is the direct connection to your bottom bracket and ensures that your Chain or Straps moves smoothly. Due to the constant stress it is subjected to while riding, the chainring is one of the wearing parts on your bike that you should check more frequently and replace if necessary. You can find the right spare part at CONTEC!

The CONTEC C.Drive B chainring is made of high-quality 7075 aluminum and is therefore extremely durable and particularly light. It is suitable for e-bikes with Bosch 1st, 3rd and 4th generation mid-drive motors. The C.Drive B chainring has a bolt circle diameter of 104 mm and fits 9-speed, 10-speed and 11-speed drives.
