Description

Double Theft Protection
The QiO "One Key Solution" lock set consists of the Protect-O-Connect "RS 480 AZ" frame lock, a TRELOCK Plug-in Chain, and a lock cylinder for the Battery. The Frame Lock provides a solid foundation if you just want to secure your QiO bike briefly in front of a bakery.

With the 100 cm long Plug-in Chain, you can significantly increase theft protection even further. The cylinders for the Battery and the Frame Lock are keyed alike and can be operated using the removable reversible key. By the way, a reversible key is characterized by the fact that you can insert it into the cylinder from either side. In addition, instead of the usual sharp edges, it has only countersunk holes, so it won't damage your bag.

The "ONE Key Solution" lock set is compatible with all EINS models and the Compact AP8.

Technical data

Main colour	black
Material	nylon
Material 2	steel
