SECURITY plus Frame Lock "RS 59"

Description

SECURITY PLUS's RS 59 frame locks The RS 59 from SECURITY PLUS is a permanently mountable frame lock that is very easy to use. It serves as an immobilizer for short stops at the bakery on the way to work or across the city. With its simple handling, it is ideal for use on city bikes.

A removable key locks the frame locks. You can attach the RS 59 either to the Pletscher plate or to the perforated rear triangle of the bike frame. Because the RS 59 is made of steel, it is particularly resistant to sawing attacks.
