

Product data sheet

TUGA CHEMIE Wheel rim cleaner "Aluminium Teufel PLUS"

Article number:	4070623W
Original number:	AT-5-D
EAN:	4032518000063
EVP:	57.75 €

Technical data

Application	steel, aluminium
Design	rim cleaner / rust film
Features	ready-to-use, preserving
Range of application	external cleaning
Main colour	red
Container type	canister
Content	5000 ml
Weight	5.000 kg

Description

TUGA CHEMIE Rim Cleaners "Aluminum Devil PLUS"

For painted steel and alloy rims, red, extra-strong

Dissolves and removes typical rim contaminants, such as baked-on brake dust, surface rust, and other road grime; cleans automatically (spray on, let it sit, rinse off); leaves behind a molecular protective layer (water-repellent effect).

Note: Test rims for compatibility before use. The Cleaner contains acid and is therefore not suitable for unpainted, repainted, polished, anodized, chrome-plated, multi-piece, or Stainless Steel Rims. Do not spray on plastic parts.

Do not let it sit for longer than 2 minutes, as this may cause damage to the material. Do not use on warm or hot rims or in direct sunlight. Not suitable for two-wheeled vehicle care (e.g., motorcycles). Rinse thoroughly with water!

5-liter canister
