Description

Simple & practical backpack for daily commuting
Pack your backpack, shoulder it, get on your bike and off to the office - the "Mile Grinder Commute 25" is a simple, timeless backpack that CONTEC has developed specifically for the demands of daily commuting. With a capacity of 25 liters, it offers enough storage space to carry notes and food for your lunch break. The elasticated outer pockets are suitable for water bottles, while the rubber mesh on the front makes it quick and easy to attach your rain jackets or helmets.

With its roll-top closure, the "Mile Grinder Commute 25" is not only heavy-duty, because together with the waterproof material from which the backpack is made, the Connector prevents rain from penetrating directly. It is also practical that you can attach an additional rear light to one of the loops so that you can be seen even better in cloudy conditions. To ensure that CONTEC's commuter backpack fits you perfectly, the Shoulder Belt can of course be adjusted to suit your needs. With the waist belt closed, you can distribute the load even better.
