

CONTEC Handlebar "Vertigo"

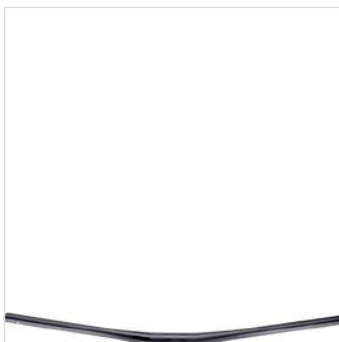

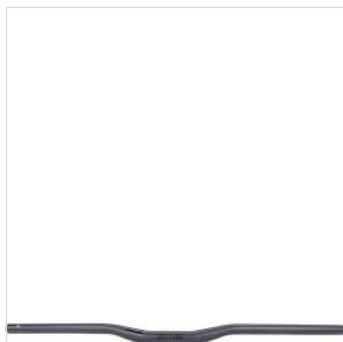

Description

Light and ergonomic

CONTEC manufactures its "Vertigo" handlebar from particularly light and stiff 7050 aluminium. This makes it particularly suitable for demanding use on the trail.

Do your hands fall asleep every now and then when you're biking? This phenomenon is a thing of the past with this handlebar. CONTEC offers a wide range of different widths, rises and back sweeps so that you can perfectly adjust your steering zone to your riding position.
