EVP:	**4999.95 €**

Description

Our "Xyron S 4.0" combines the versatility of an all-mountain bike with the ruggedness of an enduro bike—perfect for challenging rides and fast descents.

The fully integrated 600-Wh battery in the closed down tube creates a clean, sleek look that's not only attractive but also practical. Thanks to fewer components and a quieter drive system, it stands out above all for one thing: less weight! Our "Xyron S 4.0" weighs in at just 23 kg—an outstanding result!

The combination with the Bosch mid-drive motor gives you valuable reserves and powerful assistance when you need it—uphill, on long rides, or simply to spend more time off-road.

You'll have full control thanks to the SRAM drivetrain and hydraulic disc brakes, no matter how rough the trail gets. The geometry puts you in an active, centered position—for efficient climbing and stable handling on descents. And with the hidden kickstand mount, the bike remains well-thought-out and functional even for everyday use.
