

CONTEC Stand Pump "Air Support Boost"

Description

Attention tubeless fans: With the Air Support Boost, we finally have a hand compressors with an air tank for you! The Air Support Booster is ideal for your tubeless tires, but can also be used as an ordinary Stand Pump when the tank is not full.

With just a few strokes, the hand compressors can reach an air pressure of up to 11 bar or 160 psi. To fill the tank, the kick lever must be pointed upwards. Once the desired volume of air has been reached, press the lever down again - and the air flows out of the tube all at once. This creates a rapid air flow that fills the Tires evenly in no time at all.

If you want to use the Air Support Booster as a normal Stand Pump, the lever must be in its neutral, horizontal position. The Twin Valve head fits Auto (AV) and Presta (SV) valves.

With a height of 71 cm and a 100 cm long tube, the Air Support Booster offers you enough space for pumping so that you don't end up in an unhealthy position. An ergonomic handles / grips and a large tread surface provide additional stability.
