

CONTEC Pedal "Twoface"

Description

MTB pedal "Twoface"

The "Twoface" from CONTEC is the ideal pedal for biking on rooty and twisty trails. With its CNC machined aluminum body and its extra flat profile, it gives you the necessary ground clearance for sharp turns. The CrMo pins provide the right grip, so you always have a secure footing. The individual pins can also be replaced if they should ever be damaged. Wetness, dirt and grime can not harm the pedal. The sealed industrial bearing lets influences from the outside neither pure nor oil or grease out. The maintenance effort is therefore significantly low and the driving pleasure is nothing in the way.
