

CONTEC Chain Stay Protection "Neopren"

Description

Reliable protection against scratches

When you take a mountain or cyclocross bike ride on rough terrain, the chain will inevitably slap. The result is often damaged paint and corrosion on the chainstay. The CONTEC chainstay guard made of robust and durable neoprene provides a reliable remedy.

The dirt-resistant and machine-washable chainstay protector is simply attached to the stay with a hook-and-loop fastener, thus preventing scratches from chain slaps. The CONTEC chainstay protector enables fast, worry-free off-road riding and is available in self-service packaging. It offers secure paint protection.
