CONTEC Chain "eNHANCED Drive +"

Description

The plus in reliability and durability

Those who depend on their bike every day and in any weather, do not compromise on the quality, reliability and durability of their drivetrain components. This is why the Longlife e-bike chains of the "eNHANCED Drive +" series are particularly durable and wear resistant in all weather conditions, as well as being able to handle high continuous loads thanks to hardened pins and a special, environmentally friendly anti-rust coating. The CONTEC chain "eNHANCED Drive +" Singlespeed is therefore particularly suitable for all singlespeeds, fixies or e-bikes with internally geared hubs and powerful mid-motors from all common manufacturers (Bosch, Panasonic, Yamaha, etc.).

The titanium-grey chain is available in the variants 1/2" x 1/8" with 128 links and 1/2" x 3/32" with 136 links. It can be easily installed and removed using the supplied master link. The CONTEC chain "eNHANCED Drive +" is recommended for those who count on their bicycle all year round and who place the highest demands on the longevity and reliability of their drivetrain components.
