EUROLUB Antifreeze "D-65"

Description

EUROLUB Radiator Coolant "D-65"
Concentrate, down to -37 °C, suitable for G11, G12+, G12++, G13
Ethylene glycol-based coolant. It contains a silicate- and OAT-based inhibitor package. It is free of nitrites, amines, and borates.
Note: The product must be used with a water thinner before use!
Since the specific application benefits—such as good aluminum protection and longer service intervals—are only achieved when used alone, mixing with other coolants is not recommended.
