

SCHWALBE Tube "Nr. 17"

Description

SCHWALBE Tube No. 17
You can't even see it on the bike, and yet every bike needs (at least) two of them: bicycle inner tubes.
The ETRTO size on the sidewall of the tire tells you which tube to use. The first two digits before the hyphen indicate the tire width in mm, while the digits after the hyphen indicate the tire's inner diameter, which for No. 17 is 27" and 28".
When it comes to the valve and the correct length, it's best to use your old tube as a guide: for No. 17, the Sclaverand SV valve is 60 mm.
