

CONTEC Insulating Tape "Iso Tape"

Description

For a perfectly wrapped handlebar tape

Properly placed derailleur and brake cables are a prerequisite for a well-wrapped handlebar tape. The CONTEC insulating tape "Iso Tape" is ideal for fixing the outer casings on the handlebar. The black tape is particularly thin as well as elastic and can therefore be used to fix the tape in the area of the handlebar clamp.

The insulating tape is available as a roll and is a practical tool for numerous works on the bike.
