Article number:	03189851
Original number:	VPG-130A
EAN:	4251971173156
EVP:	**20.95 €**

Description

The Bolt R Grips provide an all-round good feeling on the trail. Their silicone compound is non-adhesive, pleasant to the skin and offers a high level of grip at the same time. The integrated damping ensures that shocks and vibrations caused by riding over uneven ground, such as roots or stones, are gently absorbed. This means that your hands and wrists won't ache on adventurous routes, even in the long term.

The grips are designed with different patterns that have been placed in the appropriate places to emphasize the best possible ergonomics. The grips are both 138 mm long and are attached to the Handlebar using a clamping ring. With the 22.2 mm handlebar clamps, the grips fit on any conventional, straight handlebar.

Good to know: The CONTEC Bolt R grips are made from recycled materials! The silicone compound is made from recycled plastic and rubber and the clamping rings are made from recycled aluminum.

Technical data

Mounting	left and right (pair)
Range of application	MTB, BMX
Main colour	black
Form	round
Clamp	inner clamp
Material 1	silicone
Lock ring material	aluminium
Weight	0.146 kg
