CONTEC Stem "Forge"

Description

Forge, the Ahead Stem from CONTEC The keyword is fine-tuning your riding position: the choice of stem determines the last few millimetres of how you ride: the longer and flatter the stem, the more stretched out you are - the shorter and steeper the stem, the more upright you are. With its Forge, CONTEC has developed an Ahead Stem that is clamped to the outside of the 1 1/8" diameter steerer tube.
