CONTEC Saddle "Anatomic"

Description

Many people enjoy travelling into town, touring at the weekend and commuting to work by bike. If your bike is one of your main transport options, you know that comfort is just as important as safety when it comes to cycling equipment.

You'll find a combination of both in the CONTEC Anatomic saddle: in this saddle made of high-density PU foam, you can sit comfortably at all times. Inside there is a comfortable gel insert that moulds to the shape of your buttocks when you sit down and slides back into its original shape when you get off. The surface consists of a synthetic PVC cover that is vacuum-sealed, 100% waterproof and therefore easy to clean.

The Zone Cut version has a hole in the centre of the saddle to provide even more relief for the most sensitive areas of your body.

The handle on the underside of the saddle is also particularly practical, making it easier for you to transport your bike easily. When developing the shell structure, we opted for a patented double density (D2). The durable and lightweight plastic core shell is used to cushion the contact zones, i.e. where you are in contact with the saddle. The elastomer suspension provides additional cushioning. The PU foam inside the saddle is made from recycled materials.

Article number: 07262021

Original number: VL-6539

EAN: 4251971158948

EVP: 49.95 €

Technical data

Width	198.0 mm
Features	gel, waterproof cover
Range of application	city & trekking
Main colour	black
Suspension	elastomer
Gender	unisex
Length	263.0 mm
Material 1	polyurethane (PU)
Material 2	polyvinyl chloride (PVC)
Material 3	gel
Material 4	steel
Rails material	steel
Shell material	polyurethane (PU)
Seatpost diameter from	micro-adjust
Weight	0.589 kg
