## FAHRER Battery Protection "UNIVERSAL - Gepäckträger"

### Description

#### Universal Carrier

The "Universal Carrier" from FAHRER BERLIN protects a variety of batteries that are placed on the carrier. The 4 mm thick neoprene comes around the Battery and protects it from dirt, stone chips, cold and other weather influences. The protection also allows the Battery to reach operating temperature faster and maintain it for longer - which also extends the riding time.

The elastic universal cover fits batteries from Bosch, Shimano, Yamaha, Bafang and others.
