Description

A hidden treasure: With our Treasure Fork Minitool you have a high-quality multitool that is worth more than all the money in case of a breakdown. The Treasure Fork is well hidden, but easily reachable in the head tube of your fork and can be ready for use with a little twist. The tool is made of high quality CNC machined aluminum and has a mini ratchet with switch lever, which can be equipped with the 6 different bits (3, 4, 5 and 6 mm hexagon socket as well as T25 and slotted screwdriver), which are hidden in the grip of the ratchet. In addition, two chain rivet pins can be stored, which can be used with the integrated chain riveter. Two tire levers made of sturdy nylon, which are also suitable for carbon rims, complete the range of functions of the Treasure Fork Tool. To mount the Treasure Fork Tool in the head tube, the head tube must have a diameter of 1 1/8 inches and be at least 150mm long.

Technical data

Design	multitool
Main colour	black
Secondary colour	silver
Functions	10
Material	steel
Material 2	plastic
