

CONTEC Handlebar "Moab"

Description

CONTEC handlebar

The Moab is a handlebar made of aluminum from the house CONTEC with a width of 780mm. The stem clamp is 31,8mm.

Your hands fall asleep every now and then while biking? This phenomenon is a thing of the past with this handlebar. The backsweep of 9° provides ergonomic grip of the handlebar. It defines the bending in the direction of the saddle. The handlebar has a rise of 25mm to counteract feelings of rollover on steep descents.
