

CONTEC Stand Pump "Air Support Twist"

Description

A reliable Stand Pump belongs in every well-equipped household. Thanks to the triple-valve head and the additional adapters, you can use the CONTEC Air Support Twist hand compressors to inflate not only your bike tires, but also your air mattress or soccer. The universal head fits Auto (AV), Presta (SV) and Dunlop valves (DV).

With the powerful Air Support Twist, up to 11 bar or 160 psi of pressure can be generated in just a few strokes. So that you always have an overview of the exact air pressure, you can read it off the large, rotating Pressure Gauge at the same time.

Thanks to the 80 cm long tube with a Stand Pump height of 55 cm, you don't need to adopt an unhealthy posture when pumping. The ergonomic handles / grips and the large foot offer you additional stability.

The Air Support Twist is made of high-quality steel and plastic and is available in two paints.
