

Product data sheet

Ate Brake bleeding device "FB 30"

Description

ATE brake bleeding device "FB 30"

5 - 30 liters, with suction device and electronic pressure regulation (EDR)

For filling, flushing and bleeding electronic brake systems. Suitable for all common DOT3 and DOT4 brake fluids. Direct removal from 5, 20 and 30 l containers is possible. Three pressure levels (0.4 / 1.0 / 2.2 bar) and a variable pressure setting (from 0.4 - 3.5 bar) are available. A Pressure Gauge enables the selected pressure to be checked. The central, ergonomic control panel is used to switch between the suction and filling/venting functions. Signal lights indicate the selected function.

Technical data: Mains connection 100 - 240 V / 50 - 60 Hz, delivery rate pressure pump min. 50 l/h at 2 bar back pressure, delivery rate suction pump approx. 1.0 l/min, automatic limit switch-off of the pump at approx. 9 mm residual level in the container, Connecting Cable 5.0 m, filling hoses 3.5 m, dimensions (H x W x D): 915 x 475 x 380 mm

Scope of delivery: Device incl. collecting bottle (without liquid container), operating instructions, air bleed neck no. 20 (Europe nozzle), **FB 30S**, with large rear wheels

Article number:	65575995
Original number:	03.9302-3015.4
EAN:	4006633434577
EVP:	1550.70 €

Technical data

Application	bleeding, filling, rinsing
Design	brake system
Working pressure	2.2 bar
Range of application	brake fluid
Main colour	black
Secondary colour	white
Accent colour	blue
Flow rate	50 l/h
Height	915.0 mm
Content	30000 ml
Material 1	steel
Material 2	plastic
Weight	19.230 kg
Use	car
