Description

With the Xyron ST 8.0, the fun doesn't start on rough terrain—it begins with the precise interplay of power, line, and control. A quick burst of speed out of a turn, the next patch of roots, a climb that requires less effort thanks to Bosch assistance, and downhill sections that leave room for speed.

The full-suspension setup with 150 mm of travel offers plenty of reserves without making the trail feel too soft. The carbon frame brings a crisp, modern edge to the riding experience. The Xyron ST 8.0 isn't loud, but it's decisive: grippy, focused, and with enough energy for countless laps after work.
