Original number: 411Z01C001

EAN: 4251971148390

EVP: 14.95 €

Description

The Thrubee Switch release lever is suitable for the CONTEC Thrubee series thru axles-front, rear and UDH - and enables quick and easy installation and removal of the thru axles without any need for additional tools. The lever can be stored either in your bag or in the thru axle, where it is held securely in place and stays securely in place even when riding harder. A special feature of the Thrubee Switch is the integrated T25 star socket bit, which is suitable for the brake calliper bolts, for example.
