VICTORIA Electric urban bike "UTILYON 3" (#1)

Description

With its wide 29-inch wheels, the UTYLYON sets the stage for a smooth ride. This is because the approach angles over smaller obstacles—such as lowered curbs or potholes—are shallower, ensuring a high level of comfort and minimizing jolts.

Payload and luggage capacity also play a particularly important role with the UTYLYON. A gross vehicle weight rating of 180 kg for the Fahrer, bike, and luggage allows for significantly more flexibility in personal mobility. That's why there's more than just the option of attaching panniers to the stylish Carrier. Thanks to the optional front Carrier, smaller items can also be stowed within the rider's field of vision, directly under the Handlebars.

To ensure that the total weight of up to 180 kg can be handled with ease, the "UTILYON 3" features the Performance CX engine from the Bosch Smart System, which draws its power from the PowerTube 750. This isn't just enough for longer distances. Thanks to the continuously variable Enviolo Heavy Duty Internal Gear Hub and the virtually maintenance-free Gates CDX Straps, comfort is exceptionally high.

So who is the "UTILYON 3" designed for? We developed this model for anyone looking for a versatile design that can handle a wide range of needs. This includes multi-day cycling trips with the necessary luggage. But it's also ideal for running small errands at the supermarket. These items can then be stowed in various places—provided you have the appropriate bags and baskets.

The Contact Urban from Continental offers excellent grip; it's even available in the 60-622 size for the UTYLYON and gives the bike a harmonious overall look. The mandatory Reflective Stripes ensure adequate passive safety. The 120-lux LED lighting ensures active illumination of the route. At the rear, the light is not only integrated into the fender but also features a motion sensor that triggers an additional lighting function—which essentially acts as a brake light when speed is suddenly reduced. Technically, however, it's a stop light. Either way, we definitely didn't want to do without this useful safety feature on the UTYLYON.

Speaking of speed reduction: The UTYLYON is brought to a stop by a hydraulic Disc Brake in the 203/180 mm size. The brake rotors, which are significantly thicker in cross-section, ensure long-lasting stability and thus fit perfectly with the UTYLYON concept.

The "UTILYON 3" is available as a dynamically designed model with a top tube or as a stylish mono-frame version. As with all new VICTORIA models, the battery integrated into the down tube can be removed from the top, eliminating the need to support the bike as would be required when removing it from the bottom. However, given the large capacity and the resulting weight of the battery, we recommend charging it on the UTYLYON instead, as it's simply more convenient.

Article number: 02920328

Original number: BK25HV5250H

EAN: 4251971151215

EVP: 5499.00 €

Technical data

Battery capacity	750.0 Wh
Features	XXL frame, chain guard, electronic sliding aid, fender
Torque	85 Nm
Colour designation	cappuccino brown
Main colour	brown
Secondary colour	black
Gender	ladies
Gears	stepless
Type	urban bike
Wheel size	29 "
Material	aluminium
Engine power	250 W
Frame height	56 cm
Weight	28.900 kg
Permissible system weight	180 kg
Chainstay	495 mm
Toptube	634 mm
Reach	430 mm
Seat tube	560 mm
Seat angle	75.0 °
Stack	686 mm
Steering tube	160 mm
Steering tube angle	69.0 °
