

## spanninga Helmet Light "Thor 1100"

### Description

#### Multisport lighting system

Equipped with a CREE XM-L2 LED, which produces an amazing beam of light (1100 lumens), yet still achieves a long runtime of up to 10.5 hours in ECO mode and 6.5 hours in BOOST mode thanks to the high-performance lithium-ion batteries (8.4 V 5200 mAh Samsung Li-Ion battery pack in waterproof neoprene case), is suitable for almost all outdoor sports (e.g. mountaineering, caving, ski touring, canyoning etc.). The robust aluminum housing is shockproof and waterproof (IPX-8 for permanent submersion up to 2 m). A Shifter can be used to switch between BOOST mode and ECO mode (30 % less power). The Thor has a "Safe-Switch-Mode" for switching on and off, which prevents it from being switched on accidentally, e.g. in a bag.
