Description

The ideal foundation for building a tubeless-ready wheel for 27.5" (650B) bikes with 32 spokes. Thanks to its hollow-chamber construction, the Xeta Aluminium Rim, made of 6063 aluminum, is particularly lightweight and sturdy. When assembled into a complete wheel, these rims are suitable for a system weight of up to 150 kg. With an inner rim width of 25 mm, tires ranging from 42 to 62 mm in width fit on the rim. The single-eyelet nipple holes ensure additional durability of the aluminium rim by reducing friction between the Spoke Nipples and the rim and also preventing the Nipples from grinding into the rim. The Xeta rim is only suitable for wheels with disc brakes. You can find compatible tubeless Rim Tape in our CONTEC product range.
