

Product data sheet

SHIMANO

Description

The SHIMANO RT-CL700 brake rotors rely on ICE TECHNOLOGIES and an optimized 3D aluminium carrier, which dissipates heat particularly efficiently and reduces noise at the same time. The two-piece sandwich construction made of stainless steel and aluminum ensures high stability and constant braking performance even during intensive use. Thanks to the Center-Lock mount with Lock Ring, the rotor can be mounted quickly and is compatible with resin and metal pads - ideal for road bikes, gravel and MTB.

Technical data

Construction	Two-piece
Mount	Center Lock
Diameter	140.0 mm
Features	with Ice-Tech cooling technology
Main colour	silver
Material 1	stainless steel
Material 2	aluminium
Weight	0.136 kg
