

Product data sheet

CONTEC Chain Stay Protection "Zen"

Description

Discreet paint protection

Chain vibrations when riding on uneven terrain usually cause damage to the paints, which exposes the frame material underneath to environmental influences. The CONTEC "Zen" chain stay guards made of durable silicone reliably and discreetly protect steel, aluminum and carbon frames from damage.

This self-adhesive chain guard measures 260 x 27 x 20 mm, is easy to attach and discreetly protects beautiful frames. For cyclists who don't want to regret anything.
