

CONTEC Front Light "DLUX 120 E+"

Description

Bright & safe through commuter traffic

For the daily commute, an LED headlight with 120 lux is just right for the e-bike. The high beam power provides both very good visibility in road traffic and excellent illuminated paths.

This headlight is suitable for connections to batteries with a 6 to 12 volt voltage. Thanks to the plastic universal holder, the light can be mounted easily. But so that you are not only seen from the front or rear, recesses have been let in on the sides of the housing. This allows the light to spread more widely. The headlamp can be precisely adjusted via two axes.

The lightweight and robust aluminum housing promises a long durability of the headlamp. The lighting has a German mark of conformity. With the removable front reflector it puts in terms of visibility again a top and meets the requirements of the Road Traffic Licensing Regulations (StVZO).

Technical data

Design	front light
Features	reflector
Attachment	universal
Operating voltage	6,0, 6,5, 8,0, 12,0 V
Range of application	bike
Main colour	black
Intensity	262 lumen
Illuminant	LED
Luminosity	120 lux
Material 1	aluminium
Weight	0.102 kg
Current type	DC
Power supply	E-bike battery
StVZO conform	yes
