

CONTEC Frame Lock "PowerLoc L"

Description

PowerLoc L Frame Lock

The "PowerLoc L" Frame Lock from CONTEC combines high resistance to forced entry with a simple, stylish design. Its 8.5 mm-thick bar is made of hardened special steel to resist sawing, cutting, and impact attacks. On top of that, the "X2-Power" double-sided bolt locking system significantly increases resistance to pulling.

The lock accommodates balloon tires up to 57 mm wide. CONTEC also offers a key replacement service for the "PowerLoc L" in case of loss. Includes a Loc-in feature for connecting to a CONTEC PowerLoc Plug-in Chain.
