

AXA Rear Light "Slim Steady"

Description

The practical slim one

The "Slim Steady" design fits in perfectly with the trend towards ever lighter and narrower bikes. This rear light is not even 20 mm thick. Thanks to its minimal height, you can use it on almost any Carrier.

The intelligent design of the rear lights ensures optimum light supply and distribution. As a result, you as a cyclist are clearly visible to oncoming traffic not only from behind but also from the side. You can also see other road users at a distance of up to 600 m.

The built-in parking light function provides additional safety. This ensures that the rear lights remain lit for another 4 minutes when stationary.

Thanks to the practical pressure connections, this rear light can be easily connected to both a flank dynamo and a Hub Dynamo. You can also combine the "Slim Steady" with a 6 V e-bike battery pack.

The rear light is shock and water resistant, as the lens and rear plate are welded together.

Article number:	03117653
Original number:	93911895KB
EAN:	8713249348896
EVP:	12.95 €

Technical data

Design	rear light
Features	reflector
Attachment	carrier 80mm
Range of application	bike
Main colour	black
Functions	standlight
Illuminant	LED
Material 1	plastic
Weight	0.050 kg
Power supply	dynamo operated
StVZO conform	yes
