Description

Flat model for nimble rides
This pedal scores with a bright eye-catcher: Its reflectors make every touring bike even safer.

With the CONTEC city/touring pedal "Ramp" every bike excursion becomes a carefree experience. Because even at dusk or in unfavourable lighting conditions due to cloudy weather, the pedal ensures high protection through its integrated reflectors with the best visibility. The orange-yellow reflective elements are located on the side of the large contact surface.

Thanks to its lightweight structure, the pedal enables fast and safe riding with a touring bike. The one-piece, flat pedal body made of nylon weighs only about 257 g. The sealed cartridge bearings and the CNC-milled CrMo axle ensure convincing stability and are extremely robust even on a tour in bumpy terrain.

The high-quality pedal meets the high demands for every owner of a touring bike. With its comfortable contact surface and integrated reflectors, it ensures safe and relaxed rides on and off the road.
