Description

Relaxed hands through good ergonomics
Touring bikes with flat bars allow for an athletic seating position and thus relieve of the seat bones - but the right grips are decisive for high riding comfort.

The CONTEC grip "Tour Pro Kork" with its special wing-shaped design prevents the wrists from buckling and prevents fatigue of the hands and wrists even during longer rides. The special D2 two-component design with 2 rubber mixtures and a haptically pleasant cork layer ensures optimal grip and excellent damping properties: The soft gel mixture in the palm area enables maximum comfort and effective shock absorption, while the hard mixture in the outer grip area facilitates a good hold on the handlebar. The grips are available in pairs in black and cork in different sizes.

Due to their excellent ergonomic properties, the CONTEC grips "Tour Pro Kork" are suitable for both long rides and on city bikes used daily.

Technical data

Mounting	left and right (pair)
Main colour	brown
