

SIGMA SPORT Helmet Light "Buster 2000 HL"

Description

Slope floodlight

The model name of the "Buster 2000 HL" says it all: the helmet light from SIGMA SPORT with anodized aluminium housing illuminates the MTBs trails in front of you with up to 2000 lumens if the tour is to last well into the evening hours. This is ensured by three high-quality "Cree LEDs" and the powerful battery pack.

The "Buster 2000 HL" has seven light modes, four of which are in continuous light mode with "Eco" (300 lumens), "Standard" (600 lumens), "Power" (1300 lumens) and "High Power" (2000 lumens). There are also the "Flash", "Pulse" and "SOS" turn signal modes. Depending on the level, the "Buster 2000 HL" lights up for between 2 and 21 hours.

The remote control with fluorescent Shifters makes it easy to switch between the light levels while riding: the 14 g lightweight Holder can be easily attached to the Handlebar using a rubber ring. The universal Holder adapts flexibly to all common Helmet models. There is also an adapter for Actions Cams Holders.

The battery pack offers an output of 6400 mAh. It can be attached completely scratch-free to the top tube, for example, using the silicone straps. The four-stage indicator shows the charge level. The Battery Pack can also be used as a Powerbank via the USB port.

Article number: 07101009

Original number: 17001

EAN: 4016224170012

EVP: **219.95 €**

Technical data

Design	front light
Features	USB charging connection, charging via USB, toolfree assembly, incl. charging station
Attachment	helmet attachment
Range of application	outdoor
Main colour	black
Functions	diverse light modes
Intensity	2000 lumen
Operating time max.	20 h
Illuminant	LED
Material 1	plastic
Weight	0.686 kg
Power supply	battery mode
StVZO conform	no
