

AXA Frame Lock "Defender"

Description

Protects what matters

The AXA "Defender" is a high-quality Frame Lock with an innovative design. It allows you to insert a plug-in cable or Chain into the side of the Lock to secure your bike to a fixed object.

The Frame Lock provides optimal protection thanks to its anti-drill cylinder and hardened steel shackle. The ergonomic control knob and the practical folding key with online key service offer you maximum convenience.

The "Defender" can be mounted in various ways. By default, the Lock is mounted using the flexible mounting kit, which fits any frame tube. However, it can also be secured from above with a Screw.
