ergotec Stem "Cat2"

Description

Cat2 Standard Stem

Fine-tuning your riding position: the choice of MTB stem determines the last few millimetres of how you ride on your MTBs: the longer and flatter the stem, the more inclined it is - the shorter and steeper the stem, the more upright it is. The Cat2 from ERGOTEC is a threaded MTB stem with a diameter of 22.2 mm, which is clamped in the steerer tube and can therefore vary in height. The stem length is 300 mm (note minimum insertion depth!).

- Handlebar clamps: 25.4 mm
- Steerer clamp: 22.2 mm
- Stem length: 40 mm
- Material: aluminum
- Paints: black
