

SPEC-X Oil temperature gauge

Article number:	04608386
Original number:	T03-50A6
EAN:	4250311355757
EVP:	29.70 €

Technical data

Main colour	silver
Thread diameter	27 mm
Thread pitch	2,00 mm
Length	14.0 mm
Material	aluminium
Weight	0.056 kg

Description

SPEC-X Direct Oil Temperature Gauge

Replaces the original oil dipstick. Thanks to the reliable oil temperature Display, the Fahrer can immediately see when the motorcycle has reached the optimal oil temperature. If temperatures rise, the Fahrer can react immediately to prevent potential overheating and, consequently, possible engine damage. Thanks to the damping fluid inside the gauge and the 35.5 mm dial diameter, the oil temperature is very easy to read without any vibrations. Once the engine has warmed up, the dial housing can be rotated to the desired position.

Before installation, it is essential to compare the original dipstick with the direct oil temperature gauge. The thread, pitch, and length must match exactly., HH 163

Thread diameter (mm): 24

Pitch (mm): 2.0

Length (mm): 14
