

CONTEC Front Light "Strata lead 40"

Description

Whether you are cycling in shady forests, in the twilight of the evening or at night. As exciting as these moments make your ride, it is just as important to remain clearly visible to others and not be overlooked. So why not let the CONTEC Strata lead 40 light your way?

The Battery Front Light has two different brightness levels (level 1: 15 lux, level 2: 40 lux). This gives you clear and bright illumination of your near and far range. The front lights also have a battery charge level indicator so that you are never suddenly left in the dark without light.

Thanks to the universally adjustable Bracket, the front light can be mounted on all handlebar variants. The Bracket also has a rotating function that allows you to individually adjust the light. When you park your bike, you can quickly slide the battery-powered headlight out of the Holder so that you don't have to expose it to the risk of theft.

The battery (1000mAh) is replaceable, has a USB-C connection and offers you up to 11 hours of lighting power depending on the brightness level set.
